Optimising & Pre-Setup

Did you know that almost every machine purchased comes pre-loaded with a large number of software items which you do not require and can greatly slow down your brand new PC! Very few of these items of software are for your benefit, however as computer manufacturers get paid for every item they install, the more of these the manufacturer can pre-load on your computer, the more revenue they make from each system.

At ITS, our engineers can remove these items and optimise your computer before you get it, ensuring that your system runs quicker and smoother than an identical system purchased from an internet supplier/competitor.

Our setup services are

			Your Choice
Initial Setup	We'll run through the initial system setup allowing you to just turn on the system when you get home without having to go through the setup process (up to 2 hours on some systems)	£15.00 inc. VAT	<input type="checkbox"/>
Initial Setup + System Optimisation	In addition to providing the "Initial Setup" service as above, an engineer will also remove non-required software/utilities and optimise the system startup to ensure that the system not only starts up as quick as possible, but runs faster as well.	£39.50 inc. VAT	<input type="checkbox"/>
Broadband Signup	There are many options for getting broadband. We recommend PlusNet (a BT owned company). You can sign up online for this service, however if you would like us to do the sign up for you we can provide this service (please see important note below regarding support for broadband problems)	£19.95 inc. VAT	<input type="checkbox"/>
Data Transfer	If you're an existing PC owner, this item is an ideal option. This service includes transfer of data from your existing PC, an we'll relocate your "My documents", Internet Explorer bookmarks & cookies and transfer your existing Outlook or Outlook Express email and address book for you (please note that this service includes transfer of data only, applications <u>must</u> be reinstalled by you using your existing installation media, please see terms and conditions). Note, this service only available if "Initial Setup" or "System Optimisation" options also chosen.	£45 inc. VAT	<input type="checkbox"/>
Home Installation	If you are unsure as to how to install your new system or broadband, why not choose our Home install service. For only £35, we'll install your new system in your home and connect your broadband (if ordered) to your existing telephone line. If you require additional telephone sockets or cables, we'll be happy to provide this for a small additional charge. Please note, for areas outside Lerwick & central mainland, please allow up to 14 days for home installation (see notes). Note, this service only available if "Initial Setup" or "System Optimisation" options also chosen.	£35 inc. VAT	<input type="checkbox"/>

System Order Terms & Conditions / Notes

All systems supplied with 1 year return to ITS warranty including support for operating system and any standard (excluding special order) application software supplied by ITS, all other (telephone) support is chargeable.

For non Vista operating system options, you may have to install your chosen operating system using the recovery media provided unless you have chosen an "Initial Setup" option.

For customers choosing our "Broadband Signup" service, please note that our fee covers only our time for signing up the service on your behalf. We are **not** agents/dealers for any ISP and the only service that we are providing is to arrange an account/subscription for you, the contract is between you and the ISP only and ITS is not responsible for any faults, disputes, etc which may occur.

ITS does not provide technical support for any broadband related problems you may have, you should contact your ISP in the first instance if you have any internet/email problems.

Data transfer is provided at our workshop in Lerwick (service not available on-site due to the length of time required for this procedure).

Images should be considered examples only. Some offers/options may only be available while stocks last. Terms strictly payment on delivery/collection, please ask for credit account pricing (additional 5%, existing credit accounts only). We may ask for early payment if you wish us to delay delivery of your order. Payment by cheque at our discretion and for existing account holders only.

Home Install is not available to all areas. The cost of additional telephone extensions, mains extensions, wiring, etc is not included in the Home Install charge. If you would like/require any other work done while our engineer is on-site this can be provided for an additional charge.

In order to setup your new PC and/or internet account and to provide our setup/optimisation service, every manufacturer/ISP requires that terms and conditions of use be accepted. As we are setting up a system/internet account for you, you therefore authorise us to both accept these terms and conditions on your behalf and to remove any software/applications required for optimising your system.

These terms and conditions are in addition to our full terms and conditions which all orders are subject to, please ask for a copy when you order.
